

**K26**

**HEMEVITE™**

**Supports Healthy Iron and Red Blood Cell Metabolism**

**BENEFITS OF PRODUCT**

Provides a rich source of iron compounds necessary for hemesynthesis and iron absorption.

**USE OF PRODUCT**

The lack of iron is the most common nutrient deficiency in the United States. Those most vulnerable include teenage girls, the elderly, pregnant women, menstruating women, and infants under the age of two. HemeVite™ contains ferrous fumarate and a high-quality hydrolyzed liver extract to provide a rich source of iron that does not cause abdominal discomfort. This product also contains ascorbic acid and hydrochloric acid to support the absorption of iron.

**OTHER PRODUCTS TO CONSIDER**

An additional source of hydrochloric acid, such as HCLPro-Zyme™ (Z26), may need to be taken in conjunction with HemeVite™ by individuals with decreased HCL output, such as the elderly.

**DIRECTIONS**

Take 1-2 capsules, 3 times a day, or as directed by your healthcare professional.

**Supplement Facts**

Serving size 1 capsule  
Servings per container 90
