

K30 THYRAXIS-PT™

Supports the Pituitary-Thyroid Axis

BENEFITS OF PRODUCT

- Provides glandulars, minerals, and nutrients that support the pituitary-thyroid axis.

USE OF THIS PRODUCT

The pituitary releases TSH in order to stimulate the thyroid to produce thyroid hormones. If the pituitary is suppressed, usually as a result of excess thyroid hormones, contraceptives, or elevated cortisol from stress, it may not secrete proper amounts of TSH. This product is used in the functional model to support this feedback system. Thyrax-PT™ is a broad-spectrum formulation of glandulars, mineral, and nutritional compounds used to support healthy pituitary-thyroid axis.

OTHER PRODUCTS TO CONSIDER

Thyraxis-PT™ may be used in conjunction with other products for optimal pituitary-thyroid feedback. Thyroxal™ (K12) is a broad-spectrum general thyroid support product. It contains botanicals and cofactors used to support normal thyroid hormone synthesis. Thyro-CNV™ (K09) is a nutritional formulation designed to support healthy T4 to T3 conversion. AdrenaCalm™ (K16) and Adaptocrine® (K02) are used to modulate the stress response that may cause suppression of the pituitary.

DIRECTIONS

Take 1-2 capsules, 3 times a day, or as directed by your healthcare professional.

Supplement Facts

Serving size 1 capsule

Servings per container 90

Amount Per Serving	% Daily Value	
Magnesium		
(as magnesium aspartate)	50 mg	12%
